organization of aci

Airports Council International (ACI) is the international association of the world's airports. It is a non-profit organization, the prime purpose of which is to foster cooperation among its member airports and with other partners in world aviation, including organizations representing governments, airlines and aircraft manufacturers. Through this cooperation, ACI makes a significant contribution to providing the travelling public with an air transport system that is safe, secure, efficient and environmentally compatible.

Manual de Políticas y Metodos Recomendados de ACI 2009

El Manual de Políticas y Métodos Recomendados de ACI (7ª edición) 2009 es una recopilación de las distintas posiciones de política y reglamentación aprobadas por los socios de ACI. Contiene las políticas, acuerdos y reglamentación actuales de la organización para su uso por el personal de oficina de ACI World, las oficinas regionales y por representantes de ACI en las reuniones internacionales.

ACI Annual World Airport Traffic Report 2010

statistics

The ACI World Airport Traffic Report 2010 covers airport traffic statistics and rankings for the specified calendar year in three areas: passengers, cargo (freight and mail) and aircraft movements. Individual airport entries give international terminal and domestic breakdowns.

A total of 1318 airports from 157 countries participated in the survey this year. The latest report includes traffic analysis, trend charts, country-by-country and airport-by-airport data.

ACI Quarterly Traffic Bulletin

ACI has compiled a new Quarterly Traffic Bulletin of global traffic performance (passengers, freight and movements) from the previous quarter.

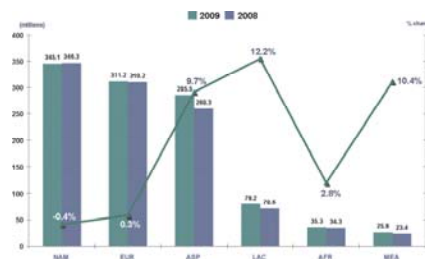

Quarterly traffic growth is shown by region for both total and international traffic. The report also shows market share by airport size, airport growth by country, and corresponding GDP figures.

Data analysis indicates the top growers and decliners along with top international airport growth, and global trade volumes.

ACI Airport Economics Survey 2011

This 16th edition of the ACI Airport Economics Survey presents airport data and analysis for the financial year 2010 / 2011, based on ACI member input through a survey conducted in 2011 (2nd and 3rd quarter). The survey drew a strong response from 605 airports that together handled 3.12 billion passengers or about 62 percent of worldwide traffic in 2010, thus providing unique and comprehensive insights into the economics and finances of airports around the world.

Aerodrome Bird Hazard Prevention and Wildlife Management Handbook

Wildlife, and in particular birds, are a known hazard to aircraft. This handbook gives guidance for wildlife management programmes to significantly increase the safety at the aerodrome and decrease the number of incidents and accidents related to wildlife.

Contents

- Chapter 1 Introduction to bird and wildlife hazards
- Chapter 2 The attraction of the aerodrome environment
- Chapter 3 Aerodrome habitat management
- Chapter 4 Bird hazard and wildlife management in the vicinity of the aerodrome
- Chapter 5 Active methods of scaring and controlling birds
- Chapter 6 Organization of wildlife management on aerodromes
- Chapter 7 Control of mammals
- Chapter 8 Reporting and record keeping
- Chapter 9 Conclusion
- Appendix A Activities covered by a wildlife hazard prevention operative
- Appendix B References, sources and internet sites

Airports and Persons with Disabilities: A handbook for airport operators

Fourth edition 2003

Paperback

40 pages

Members: € 50

Non-members: € 100

This handbook, primarily addressed to airport operators, is intended to enhance the accessibility of air travel to persons with disabilities.

Contents

- Chapter 1 Aims and purposes of the handbook
- Chapter 2 Definitions, legal considerations, types of disability
- Chapter 3 Airport infrastructure and architecture
- Chapter 4 Operational and organisational measures
- Annexes

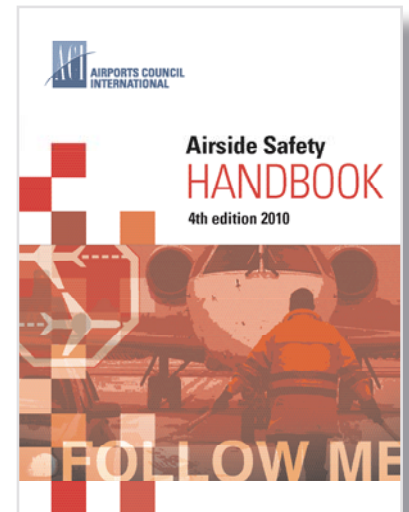

Airside Safety Handbook 2010

This handbook is a guide to airside safety and is written for airside managers. It builds on previous work by ACI - namely the Apron Safety Handbook. The remit of this handbook has been widened to include a number of selected topics relating to safe operations in outside areas.

Contents

- Chapter 1 Airport Safety Concepts
- Chapter 2 Apron Safety
- Chapter 3 Airside Safety
- Chapter 4 Safety Management Systems
- Annexes

Apron Markings and Signs Handbook

This handbook is a useful complement to ICAO documentation, such as Annex 14, Volume I (Aerodrome Design and Operations) and the Aerodrome Design Manual, Part 4 (Visual Aids) and is intended for use by planners of apron areas, ground staff working on aprons, air traffic controllers, apron controllers and pilots.

Second edition 2009

Paperback

80 pages

Members: € 75

Non-members: € 150

Contents

Chapter 1 Principles

Chapter 2 Apron and taxiway markings for aircraft

Chapter 3 Apron markings for vehicles

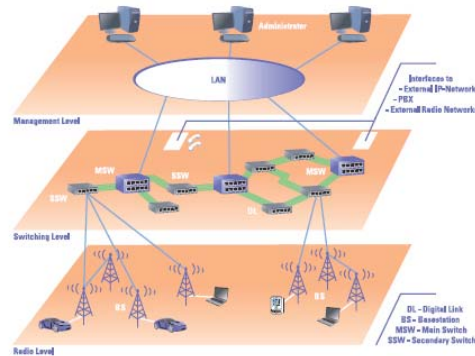

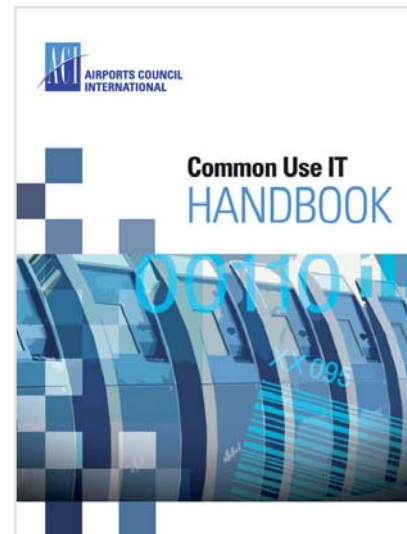

Chapter 4 Apron signs

Chapter 5 Form and proportions of letters and numbers

Chapter 6 Examples of apron markings

Common Use IT Handbook

This handbook provides a compilation of best industry practices taken from airports around the world and identifies some of the key areas that must be considered in the development of common use IT services. It provides airport operators with a high level overview as well as the detailed technical descriptions contained in the annexes.

handbooks

Contents

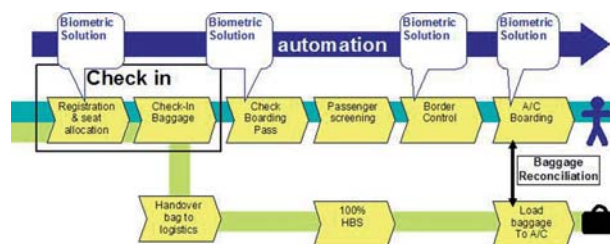

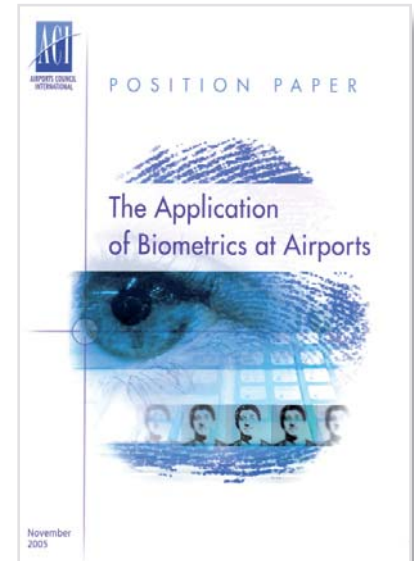

- Chapter 1 Foreword
- Chapter 2 Introduction
- Chapter 3 Communication infrastructure
- Chapter 4 Passenger services
- Chapter 5 Flight information services
- Chapter 6 Security systems

The Application of Biometrics at Airports

ACI recognizes the benefits if using biometrics to confirm personal identity for border control, airport passenger processing and airport access control, to improve security, efficiency and facilitation. Identity can be verified by capturing a biometric sample from an individual, and comparing it against references data securely recorded on a machine readable Travel document (MRTD) or stored in a database.

Contents

- Summary
- ACI Position
- Passenger Facilitation
- Airport utilization of staff biometrics credentials
- Consideration of ICAO recommendations
- Applications of Biometrics
- Definitions

ACI CUSS (Common Use Self-Service) Survey Report

The report of the Common Use Self Service (CUSS) Kiosk Survey conducted in 2005/2006 contains a snapshot of the current CUSS deployments. 90 airports responded to the survey giving a wide spread to the results. The report gives details on the types of deployments taking place at airports as well as details such as the location of kiosks, bag drop set ups, and the technology being deployed on the kiosks.
